The UltraCeram® Portable Alkaline Ionizer

The Portable Alkaline Ionizer converts regular drinking water into alkaline and ionized water that you can enjoy anywhere, anytime.

Scientifically combined minerals built within the bottle are activated upon contact with the water - resulting in enhanced, great tasting drinking water.

Why Alkaline Water?

Research indicates our physiologies function optimally when we are neither too acidic or too alkaline. Unfortunately with today's hectic lifestyle, unbalanced diet, lack of exercise and environmental pollutants we tend to be more acidic.

Drinking alkaline water may help the body maintain an optimal healthy pH balance. The UltraCeram® Portable Alkaline Ionizer makes it easier to enjoy alkaline water anytime, anywhere.

Filter

ULTRACERAM

How Does it Work?

The bottle contains two natural mineral stone filters.

Simply fill the bottle with your drinking water and the minerals are activated upon contact - creating alkaline, ionized water.

Filter 1

Replaceable Filter

Capacity: 6 months*

**Based on 2-3 litres daily consumption*

Food Grade
Stainless Steel Bottle

Filter 2

In-Built Filter

No maintenance required

For best
results, leave
to stand for
5-10 mins
